

Save the Children®

EVERY CHILD DESERVES TO GROW UP SAFE AND SUPPORTED.

Save the Children is a global leader in child protection, especially in times of crisis and conflict, when children are most vulnerable. We work with children, families and communities, as well as supporters of children around the world, to understand and address children's unique protection needs. This includes both the physical and mental health impacts of harm – including abuse, neglect, exploitation and violence – while promoting a safe family environment for every child.
